EDUCATION

ME Software Development
Bachelor of Software Development.
IT Academy Step Cambodia, Phnom Penh.
Expected Graduation: *02/03 /2025*

Relevant Coursework:

- Software Engineering
- Web Development
- Data Structures and Algorithms
- Object-Oriented Programming
- Database Management Systems
- Operating Systems

PROJECTS

Personal Portfolio Website

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
- Integrated a contact form with email functionality.
- Deployed the website on GitHub Pages.

Weather App

- Built a weather forecasting application using HTML, CSS and JavaScript and the OpenWeatherMap API.
- Implemented features like weather updates, search functionality, and user location tracking.

Gym App

- Created a gym app using React.js to display information about exercises, workout routines, and fitness plans.
- Emphasized reusable components and state management for better maintainability.

Nasa App

- Developed an interactive web app that consumes NASA's API to fetch and display astronomy-related data using React.js

Nhoung Somalin
UDAYA Technology Company

Dear Ms.Nhoung Somalin,

I am writing to express my interest in the Frontend Developer position at UDAYA Technology Company. As a Software Development student in my second year, I have developed a strong foundation in web development, particularly with HTML, CSS, JavaScript, and React.js. I am excited about the opportunity to bring my skills, passion, and dedication to your innovative team.

Throughout my academic journey, I have completed several projects that have allowed me to apply my frontend development skills. For instance, I created a responsive portfolio website and developed interactive web applications such as a weather app and a gym app using React.js. These projects not only strengthened my understanding of frontend technologies but also taught me the importance of creating user-friendly interfaces and maintaining clean, efficient code.

I am particularly drawn to UDAYA Technology because of your commitment to delivering cutting-edge software solutions. I am eager to contribute to your projects by applying my knowledge and learning from experienced professionals in your team. Additionally, I am confident that my ability to work well in teams and my problem-solving skills will be valuable assets as a junior developer at your company.

I am thrilled at the prospect of joining UDAYA Technology and furthering my career in web development. Thank you for considering my application. I look forward to discussing my qualifications in more detail.

Sincerely,
Toch Sothak
